OBJECTIVES OF THE CONGRESS

The main objective of the Congress is to contribute to the improvement of hydraulics and pneumatics technologies.

The Congress also provides an opportunity to;

- ◆ discuss scientific and technological developments in the field of hydraulics and pneumatics and their applications.
- ◆ provide a common platform for hydraulics and pneumatics engineers and technicians, academicians, researchers, developers, users, students, sector and trade associations.
- ◆ determine the required actions on education, research and legal regulations and share the current developments with the engineers and technical people working on the hydraulics and pneumatics.

It is desired that the papers presented in the Congress is a technical reference for application engineers and technical people.

Hydraulics and Pneumatics Congress with its scientific program, exhibition and social activities will be a common information and sharing platform for the hydraulics and pneumatics sector.

Engineers, academicians, technicians, companies and sector associations who are working in the hydraulics and pneumatics field are invited to contribute and give support to this common platform.

EXHIBITION

- ◆ Hydraulic and pneumatic systems and equipment
- ◆ Mobile hydraulic systems and equipment
- ◆ Hydraulic pumps
- ◆ Hydraulic and pneumatic valves
- ◆ Hydraulic and pneumatic cylinders and motors
- ◆ Air compressors
- ◆ Pressurized air preparation and equipment
- ◆ Hydraulic filtration systems
- ◆ Hydraulic oils and lubrication systems
- ◆ Fluid power seals
- ◆ Hydraulic and pneumatic systems in automation applications
- ◆ Controllers, sensors and other measuring elements
- ◆ Connection elements and equipment in hydraulic and pneumatic systems

This congress is organized by Chamber of Mechanical Engineers
Izmir and İstanbul branches.

TOPICS OF INTEREST

HYDRAULICS

- ◆ Industrial hydraulics
- ◆ Mobile hydraulics
- ◆ Marine hydraulics
- ◆ Hydraulic circuit design
- ◆ Hydraulic components and their applications
- ◆ Proportional and servo systems
- ◆ Hydraulic fluids, seals and filtration
- ◆ Safety in design and machines
- ◆ Energy efficiency
- ◆ Hydrostatic circuits
- ◆ Load-sensing control systems
- ◆ Computational fluid dynamics (CFD)
- ◆ Micro and nano flows
- ◆ Maintenance and troubleshooting
- ◆ Sector specific applications

PNEUMATICS

- ◆ Pneumatic circuit design
- ◆ Pneumatic components and their applications
- ◆ Pressurized air preparation and conditioning equipment
- ◆ Pneumatic systems in mobile applications
- ◆ Safety in design and machines
- ◆ Energy efficiency
- ◆ Pneumatic control systems
- ◆ Vacuum technologies
- ◆ Maintenance and troubleshooting
- ◆ Sector specific applications

CONTROL SYSTEMS/MECHATRONICS/AUTOMATION

- ◆ Proportional and servo control
- ◆ Simulations of hydraulic and pneumatic systems
- ◆ Controllers, sensors and other measuring elements
- ◆ Robotics implementations at hydraulic and pneumatic
- ◆ Mechatronic applications in hydraulic and pneumatic systems
- ◆ Hydraulic and pneumatic test systems
- ◆ Digital technologies

DEADLINES

| | |
|------------------|---|
| 6 May 2022 | Submission of abstract proposals |
| 27 May 2022 | Notification of acceptance of abstracts |
| 2 September 2022 | Submission of full papers |
| 3 October 2022 | Notification of acceptance of papers |

ORGANIZING COMMITTEE
